Profile

Full Stack Developer and Telecommunications Networks and Systems Engineer, graduated top of the class, with a strong foundation in scalable systems. Specialized in building and optimizing web applications. Proficient in both frontend and backend technologies such as React, Next.js, Laravel, Django, and Express.js. Passionate about clean code, problem-solving, and designing digital solutions aligned with business goals. Also experienced in containerization with Docker, deployment, automation, and continuous integration/delivery (CI/CD) using tools like Jenkins and Ansible.

Professional Experience

Collaboration & Applications Development Engineer, Djezzy Business requirements analysis, design and integration of collaborative solutions, application development, and process automation, while ensuring security, performance, and successful adoption of digital tools by end users.	05/2026 – Present Dar El Beïda, Algeria
Software Engineer, ICOSNET - Design, development, and deployment of scalable web applications using Django, React, and Next.js. - Improvement and maintenance of existing systems by integrating new features and optimizing performance. - Cross-functional collaboration with product, design, and QA teams to deliver user-centered solutions. - Dockerization and containerization of applications, with implementation of automated CI/CD pipelines using Jenkins.	07/2024 – 05/2026 Algiers, Algeria
DevOps Trainer, LogiTrans Led a DevOps training covering Git, GitHub, Docker, Jenkins, Kubernetes, Prometheus, and Grafana, with a focus on CI/CD workflows, containerization, and best practices in monitoring.	07/2025 – 07/2025 Algiers, Algeria
Full-Stack Developer, Apollo Digital Solutions - Full-stack application development with Laravel, focusing on scalable backend architectures and efficient database design (SQL/NoSQL). - Built interactive dashboards using Filament PHP to support data-driven decision-making.	05/2024 – 07/2024 Algiers, Algeria
Final Year Project, Icosnet - Developed an intelligent scheduling system using React and NestJS, applying Clean Architecture principles. - Integrated artificial intelligence features using LSTM networks to optimize time-series predictions and improve user productivity. - Designed an intuitive user interface to ensure seamless integration of AI-driven suggestions. - Technologies: React, NestJS, TypeScript, LSTM Networks, Clean Architecture	02/2024 – 06/2024 Cheraga, Algiers

Education

Engineer Degree, Network and Telecommunication Systems, ENSTICP

- A solid background in network infrastructure, security, and telecommunications.
- Completed CCNA and CCNP training, strengthening skills in network configuration, administration, and troubleshooting.

2019 – 2024
EUCALYPTUS, Algeria

Skills

Frontend
React.js, Next.js, Vite, Tailwind CSS, Bootstrap, Chart.js(visualisation de données)

Backend
Laravel (Eloquent, Blade, Filament), Django / Django REST Framework, Node.js (Express.js, NestJS), PHP

Database & ORM
MySQL / PostgreSQL (Query optimization), MongoDB (NoSQL, GridFS), Eloquent / Prisma / Mongoose

Autres outils
Docker, jenkins, ansible, grafana, prometheus, RESTful APIs, Third-party APIs, Git / GitHub / Gitlab, Github Actions, Gitlab CI/CD, Postman / Swagger, Figma (UICollaboration)

Projects

Cambridge BraineX

- Developed and deployed a Next.js website for an AI solutions provider targeting educational institutions.
- Implemented automated deployment pipelines using GitHub Actions for CI/CD.
- Technologies: Next.js, Tailwind CSS, Node.js, GitHub Actions

Cambridge BraineX Panel - Admin Dashboard

- Designed an admin panel using Laravel and Filament PHP
- Implemented automated deployment pipelines using GitHub Actions for CI/CD.
- Technologies: Laravel, Livewire, MySQL, Tailwind CSS

TendAxe - B2B Procurement & Public Tenders Platform

- Developed a full-featured marketplace with multi-vendor management and real-time analytics dashboards.
- Technologies: Laravel, Livewire, MySQL, Tailwind CSS

EIPGBM - Industrial Metal Fabrication Website

Technologies: React.js, Tailwind CSS

Whowiaty Authentication Plugin

- Contributed to the development of a high-performance authentication plugin integrating Algerian identity services.
- Technologies: React, Vite, TypeScript, REST API, JWT

Whowiaty Enterprise - Admin Dashboard

- Built a secure enterprise client dashboard to track authentication trends and generate detailed reports.
- Technologies: Next.js, Django REST, PostgreSQL, Tailwind CSS, Chart.js

Ouancharis Tourisme - Travel & Hospitality Platform

- Created a modern tourism booking platform featuring rich multimedia service presentations.
- Technologies: React.js, Redux, Tailwind CSS

OGGI Travel - Visa Application Platform

- Developed a visa application platform supporting multi-country requests and document tracking.
- Technologies: Next.js, Laravel, Redux, Filament, RESTful API, JWT

Vacanse Manager - Hotel Reservation Management System

Developed a full-featured web application for hotel administrators to manage room bookings, availability, customer information, and payments using Laravel and Filament.

Awards

1st Place – Hackathon 3.6 Batna, Algeria	01/12/2023
QBrnze & QSilver, QWorld Informatique quantique et programmation	01/12/2022
3rd place – NYUAD International Hackathon for Social Good, NYUAD ABU DHABI, UEA	01/12/2022
HCIA DATACOM, Huawei Routing & Switching	01/12/2021
